

Wade. 1622.

A

*New Almanacke,*  
and Prognostication,  
with the Forraigne  
Computation.

In which you may behold the  
state of this yeare of our  
Lord God.

1622.

Being the second from the  
Leape yeare.

Made, and set forth, by  
William Wade, Gent:  
Practitioner in  
Physicke.

LONDON.

Printed for the Company of  
Stationers. 1622.

The Anatomie of Mans body, as the  
partes thereof are gouerned, by the  
twelue Signes of the  
Zodiacke.

\*\*\*

Aries, Head and face.

Taurus,  
Necke and  
throat.

Cancer,  
Bread & stom-  
mach.

Virgo,  
Bowels and  
belly.

Scorpio,  
Secret mem-  
bers.

Capricor.  
The Ankes.

Gemini,  
The Armes  
& shoulders.

Leo,  
Heart and  
Backe.

Libra,  
Kernes and  
loynes.

Sagitarius,  
the Thighes

Aquarius,  
The Legges

Pisces, The feet.

## Physicall Obseruations.

To let the Sanguine blood when the Moone hath her course in  $\times$ .

To let the Cholericke blood when the Moone is in  $\zeta$ . or  $\times$ .

To let the Melancholy blood the Moone being in  $\cap$ ,  $\sim$ , or  $\times$ .

To let the Flegmaticke blood the Moone being in  $\Gamma$ . or  $\sim$ .

To prepare humours when the Moone is in  $\cap$ ,  $\sim$ , or  $\sim$ .

Good to  
purge

With Eleuaries, the Moone being in  $\zeta$ .  
 With Pills, the Moone being in  $\times$ .  
 With Potions, when the Moone is in  $\cap$ .

## Physicall Observations.

To take vomits when the Moone is in  $\delta$ .  $\gamma$ .  
or the latter part of  $\gamma$ .

To purge the head by Sneezing, when the  
Moone is in  $\delta$ .  $\eta$ . or  $\nu$ .

**S**ed To take Glusters, the Moone being in  $\nu$ .  $\delta$ .  
or  $\eta$ .

To stop Fluxes and Rheumes, when the moone  
is in  $\delta$ .  $\eta$ . or  $\nu$ .

To bathe when the Moone is in  $\delta$ .  $\alpha$ .  $\omega$ . or  $\chi$ .

To cut the hayre of the Head and Beard, the  
Moone being seated in  $\alpha$ .  $\gamma$ .  $\omega$ . or  $\chi$ .

## Briefe Observations of Husbandry.

**S**et, sowe Seeds, Graft and Plant, the Moone be-  
ing well seated, and in  $\delta$ .  $\eta$ . or  $\nu$ .

And all kinde of Come in  $\delta$ .

Graft also when the Moone is increasing and in  $\delta$ .  
or  $\omega$ .

Sheare Sheepe the Moone increasing.

Fell hard Timber from the Full to the Change.

Fell fryth, Coppice, and fwell, at the first quarter.

Lib and geld Cattle, the Moone in  $\nu$ .  $\gamma$ . or  $\nu$ .

Kill fat Swine for Bacon (the better to keepe their  
fat in boyling) about the Full moone.

| 4. Menſe Michael. }    | { 8. Quind. Martini.    |

Note also, that the Exchequer openeth  
eight dayes before any Terme begin (ex-  
cept Trinity Terme) in which it openeth  
but fower dayes before.

# A Description of the fourē Quarters of the yeare.

And first of Winter.

☉ in ♍. ☿ in ♋.

**W**inter, the first Quarter Astronomically of this yeere 1622. began the twelſe day of *December* laſt paſt, for at that time the Sun in our Meridian entred into the firſt part of *Capricorne*, and made the winter Solſtice, hauing the ſhorteſt day & longeſt night in all the yeare. And ſo winter Quarter continueth vntill the 10 day of *March* following, for then the Sunne entereth into *Aries*, and beginneth the Quarter called the Spring.

This winter Quarter is by nature cold and moyſt, vnpleaſant ( for the moſt part thereof ) vnto all Trauellers eyther by Sea or Land: And vnto aged Perſons it is very cumbrous and noyſome, cauſing ſuperfluities of rawnes, and abondance of noyſome to ouerflow the Body; It is an enemy to all kind of liuing Creatures, and ſhutteth vp the ſtrength and powers of the Earth.

The Sickneſſes of this ſeaſon, are gripings and griefe in the ſides, ach in the head, loynes, and Raynes of the Back, Inflammations of the Lungen, Catbars, Coughes, paines in the Breſt and Sides, palfies, Falling-ſicknes, and the like.

## A Prognostication

As for the inclination of the weather, you may see it in the daily disposition in the months following.

---

### Of the Second Quarter of the yeare, called the Spring.

☉ in ♈, ♉, ♊.

**T**He Spring being the second part of this yeare, doth begin the tenth of *March*, for when the Sunne doth enter into the first degree of *Aries*, the first equinoctiall Signe, making the day and night of one equall length throughout the whole world; and so the Spring continueth vnto the thirteenth day of *June*.

This Quarter of the yeare is naturally hot & moyst, temperaetly, and is therefore reckoned the most hollome time in the yeare to remoue Sicknesse gotten before, and to auoyde and preuent those which are likely to ensue and come: For those humors which abound in Mans Body and doe oppresse nature, are now in this Season most easily auoyded, cyther by letting of Blood, Purg- ing, Bathing, Sweating, or such like.

The Diseases of this Quarter are small Pocks, Measels, Flushing in the Face, Scabbs, Phrensie, Lithargis, Plurisies, and such like.

Touching the state of the weather you may see it in the daily inclination of the Season.

Date. 1622.

Of the Third part of the yeare  
called Sommer.

© in S. N. m.

**S**ommer. the third part and Quarter of this  
yeare, doth begin vpon the thirteenth day of  
Iune, when the Sun doth enter into the first de-  
gree of the signe Cancer, making the Sommer  
Solstice, the longest day and shortest night, for  
now hath the Sun his greatest declinatiō North-  
wards: & Summer continueth vntill the 13. of  
September, that the Sun enter into Libra.

This season by his proper nature is hot and  
dry, lykened to Choller, conuerting the humors  
in mens Bodies from cold and moysture, to  
heate and drines, and spreadeth them abroad in  
each part of the same, and mans digestion is not  
now so strong as in the colder times, by reason  
that heate is dispersed into the outward partes  
and leaues the inward.

The sickneses of this season are, Fluxes of  
Blood, and Feuers of sundry sorts, Blysters, paine  
in the Eares, Head, and Back, Pestilence, Iaudies  
and the like.

The estate of the weather you may see in the  
daily inclination.

A Prognostication  
Of the Fourth part of the yeare, called  
Autumne, or Haruest.

☉ in ♌, ♍, ♎.

**A** Vtumne, or Haruest the fourth and last part of the yeare, doth begin vpon the thirteenth day of September, for then the Sun entereth into the second equinoctiall signe **Libra**, & bringeth the day and night to be of one length againe, as before in the month of March. And this Quarter doth continue vntil the twelue day of December.

This season being of nature cold and dry, applyed vnto Melancholy, varieth altogether from the nature of the Spring, because this season is for the most part vnconstant, and is therefore called of the learned Phisitians, the Mother or Nurse of deadly sicknesses, ( and say they ) it is a most dangerous time, for what hath beene euill in the seasons before through the corrupt state of the yeare, or other accidentall causes, that same will in this season shew and vter it selfe, to the great greouance of many ; wherefore this time of all other in the yeare is dangerous for sicknes, and great heede is to be taken as well in the order of Mans dyer, as in his clothing & exercise, because of the variety of this season.

The diseases vsuall this Quarter, are many of those which molested the people in Summer, with the Emrods, spleene, grieve in the Back and Kidneys, Melancholy, Fluxes of Blood, &c.

Dade 1622.

**A** Briefe Description how the Planets are placed above the Earth in the sky, or vnder the Earth, (for euery month) after sun setting, or before his rising, by which you may perceiue how they keepe their motion night and day all the yeare. Moreouer, the New, Full, and Quarters of the Moone, with an Astronomical Iudgement of the weather for each day of the yeare. Also Husbandly instructions for each moneth of the yeare.

### January.
